

Today Science Club are going to be.....

Looking at PLANTS!

There are 4 main parts:

1. **Flowers.** For reproduction (making more plants)
2. **Leaves.** For nutrition (feeding)
3. **Stem.** Holds & moves plants towards the light. Also carries water and minerals from the roots to the rest of the plant.
4. **Roots.** Anchors the plant and soaks up water and minerals.

Please label plant! (words at base)

Experiment: To show how the stem carries water and minerals to the rest of the plant.

White carnations in water with food colouring.

Note to parents: The flower petals should change to the colour of the food dye in the cup in a day or so..
